PRESS RELEASE

WELBORN HEALTH PLANS LAUNCHES ITS MEDICARE ADVANTAGE PRODUCT ON THE ROYAL HEALTH CARE PEGASYS PLATFORM

NEW YORK, New York – January 22, 2008

Welborn Health Plans, a health maintenance organization located in Evansville, Indiana, launched its Medicare Advantage program on January 1st, and Welborn's third party administrator, U.S. Healthcare Holdings, has selected the Royal Health Care software suite to support the Medicare operation.

Welborn will be using the PEGASYS application to handle enrollment processing and reconciliation, interface with the CMS, and other health plan functions such as claims processing, provider maintenance, and customer relationship management.

PEGASYS is fully compliant in managing direct exchanges with CMS such as enrollment files and RAPS encounter data submissions. Claudia Winsett, U.S. Healthcare Holdings, Chief Operating Officer said, "We were very pleased with the functionality of the software and the support that Royal provided in assisting us in the implementation effort".

Welborn will also use Royal's Medical Management Application (MMA), a complete clinical care solution for its utilization management and care management needs. MMA and PEGASYS are fully integrated; the products are supported by the Royal Data Center, located in Albuquerque, New Mexico. Audrey Brahmsha, Royal's Vice President for Medicare Compliance and Operations stated, "CMS continues to fine tune the Medicare Advantage program and makes changes in operational requirements each year. We work closely with the Royal Data Center to ensure that our software is up to date and with our Medicare clients to train them in any changes".

Royal Health Care offers software solutions to Medicare Advantage plans that need ASP support. Royal also provides business processing outsourcing services to Medicaid and Medicare health plans.
